Some of Mud Lake's summer residents

MAASTO HIIHTO TRAIL NEWS

Remember: KNSC's blog is updated regularly. You can keep up-to-date when you "Follow by Email" to get reports sent to your inbox!

In this issue:

- Thanks!
- Capital Campaign news
- Fun new program for all ages
- Trail projects

Thanks for your support!

Be sure to watch your mail box for KNSC's end-of-the-season thank you letter. We can't say enough how much we appreciate all of our members, business sponsors, donors, and grantees. Next time you're out on the trails, look around. Corridors, bridges, gates, culverts would not be there if not for your financial support.

Capital Campaign news

We're over a third of the way there, including pledges. Did you read the flier we mailed you, acknowledging our season's many generous donors? Hats off to this big-hearted crew for getting us closer to installing a new, safe, long-lasting Sisu Bridge plus equipment needed to accomplish it.

Did you know? A tractor and backhoe will be required to install Sisu Bridge next summer. Renting this equipment would be cost-prohibitive; the wiser option is to purchase it.

Why does KNSC need the equipment after the bridge is installed? The tractor, backhoe, and other implements included in the Capital Campaign will enable us to repair and improve the trails to allow earlier and later season grooming. Having smooth trails with water kept off will also ensure significantly better summer recreation. Fixing the trails will make it easier for people of all ages and mobility capabilities to use them.

Please give today for better trails tomorrow!

"We could have these trails leveled out and fixed quite easily, with a tractor, backhoe, back blade, and ripper tooth. Installing culverts would be a snap..."

*-Chief of Trails and Bottle Washing, and campaign donor
Arlyn Aronson*

Kids of all ages! Don't miss KNSC's new Nature Journaling program, starting this summer.

Watch your inbox or the website for details!

THANKS to the City of Hancock for supporting dog-friendly trails!

THANKS to the beavers for chipping in on the River Trail extension project!

Trail project news: The River Trail extension is punched through and just needs small brush mowed and stumps cut down. A gate will soon be installed to block motorized traffic from going north on the River Trail from Tomasi Rd. Coming soon—snow shoe/back country trail signage. *Many more projects are planned this summer and fall!*
